

## **Origin Storage Announces New Security Product – Privacy Filters**

**Basingstoke, Hampshire: December – 5th – 2016.**

**Origin Storage announce new security product – Privacy Filters.**

A Privacy Filter from Origin Storage helps provide protection against shoulder surfers and visual hackers viewing your confidential and sensitive information on your computer screen.

With a Privacy Filter from Origin the intended users view of the screen remains crystal clear, whilst people viewing the screen from nearby only see a dark screen, almost as if the screen is turned off.

Available in 2-way and 4-way, with anti-glare, and touchscreen compliant. Designed to be easy to fit, the Origin Storage Privacy Filter is quick and simple to attach to your screen. Once fitted it can be removed and re-attached just as easily for those times when you need to share your screen with other people.

**Stuart Eling, Sales Manager at Origin Storage commented;**

*“At Origin Storage we are continually building our product portfolio and are always looking for innovative new products which complement our storage and data security technologies. Privacy Filters are a perfect add-on accessory for our existing solutions based portfolio.”*

### **About Origin Storage:**

Since 2003, [Origin Storage](#) has been an established provider to many of the IT industry's leading Resellers. At the heart of our success lies a dedicated team of trusted advisers with a wealth of knowledge in storage and data security. That knowledge and the confidence to constantly evolve ourselves, has seen our business branch out into new and exciting areas in the flash storage and memory arena. Our strong business relationships allow us to continually expand and seek fresh, innovative new products that add unique opportunities to the IT market place.
